

DS-DN1200KI Network Keyboard

As a self-developed new generation network keyboard, DS-DN1200KI keyboard is compatible with network cameras, network domes, DVRs, NVRs, decoders, multi-functional video centers (MVCs), multi-screen controllers, and matrix access gateways (MAGs). The user can select the network control method and serial control method as required. Featuring a 4-axis joystick, a 128 × 64 dot-matrix screen, easy-to-operate buttons, reasonable division of functional areas, and simple design, it is applicable to scenarios of monitoring centers in industries such as buildings and transportation.

- 128 × 64 dot-matrix screen
- 4-axis joystick
- Controls a maximum of 1000 devices and 2000 channels
- Supports Web configuration and batch editing with office software
- Accessible to DVRs, DVSs, NVRs, cameras, and speed domes via network or serial ports
- Supports displaying the output of the multi-functional video centers (MVCs) and decoders on the video wall
- Supports PTZ control, settings and calling of presets and patrols
- Supports system upgrade and import/export of configuration files via USB flash drive
- Supports capturing pictures and saving files to the USB flash drive
- Two-level user permission
